## *Environmental Water Technology*

In today's world where Industry is operating in the unknown, our high school graduates need a good start to get ahead in today's high technology. We at Dodge City Community College are dedicated to providing the best start to a career in water technology that is available anywhere in the world today.

The Environmental Water Technology Program offers career training in two areas, Potable Water treatment and Wastewater treatment. In each area the student can pursue either a vocational certificate or an Associate of Applied Science Degree.

The student will have classroom theory backed up with hands-on training in pumps, electrical control systems and laboratory training. Occupational Experiences are also included in the program to provide the student with real world experiences in wastewater treatment and potable water treatment as well as industrial applications.

As a graduate of DCCC'S Environmental Technology program you can work anywhere in the world. The growth predictions for the environmental field of the 90's is tremendous. Well trained operators are in demand world wide. Operators are needed every day in municipalities and private industry. The student should pick where they would like to live and usually they can find a position there.

If you think you may be interested in this type of career, call us, we will be happy to talk with you about the possibilities of getting your future started today.

## *Career opportunities*

The career possibilities are endless, well trained operators are in short supply. The following list is just an example of the possibilities:

- Potable water plant operators
- Wastewater plant operators
- Chief plant operators
- Plant managers
- Collection system
- Potable water distribution system
- Mechanical maintenance
- Industrial water applications
- Industrial wastewater applications
- Kansas Dept. of Health and Environment
- Utilities management
- Laboratory Technician
- Equipment sales
- Chemical sales
- Engineering technician

## *Advisory Council*

The advisory council is a group of people that are employed in the environmental field. They help keep us advised of changes occurring in the field. They also review our program and make recommendations on changes that they feel are necessary to keep our program current with today's technology.

The advisory council is familiar with our college, our goals, and our standards. They have hired our graduates in the past and know the results of our training. Several members use our program as a pre-requisite for employment.

## ***Admissions Procedures***

Dodge City Community College has an open door admissions policy with the following requirements for Environmental Water Technology students:

1. Complete application for admissions.
2. Send ACT scores (SAT are accepted).  
This is not required but highly recommended. Athletes must submit ACT or SAT scores.
3. Send high school transcrip or equivalent.  
(GED)
4. Send college transcript.(if applicable)

The following two items are not requirements for admission but essential planning steps for some students:

5. Submit a deposit to reserve on-campus housing.
6. Check into financial aid and scholarships.  
Make applications where appropriate.

High school seniors, with written permission from their principal, may enroll in classes for college credit.
